

COURSE PROJECT

Pick any dataset of your choice from Kaggle or elsewhere, and complete the following tasks:

- | | |
|--|-------------------|
| a. Load the data in the tool. Briefly explain the dataset | [5 marks] |
| b. Perform EDA using Python/R. Explain each step | [15 marks] |
| c. Data wrangling/cleansing etc. Explain each step | [15 marks] |
| d. Build multiple charts using Python/R. Explain observations | [15 marks] |
| e. Use of Git | [15 marks] |
| f. Use of ML techniques | [15 marks] |
| g. Overall quality of the project | [20 marks] |

Under each task, briefly explain what was done. Also attach screenshots.

Submit a final Word/PDF along with file(s) containing code; all having proper file names.

NOTE: Presentations and/or Vivas will be conducted for Group projects
